

Develop A Web Application Using Node-RED

IoT Based Safety Gadget for Child Safety Monitoring and Notification

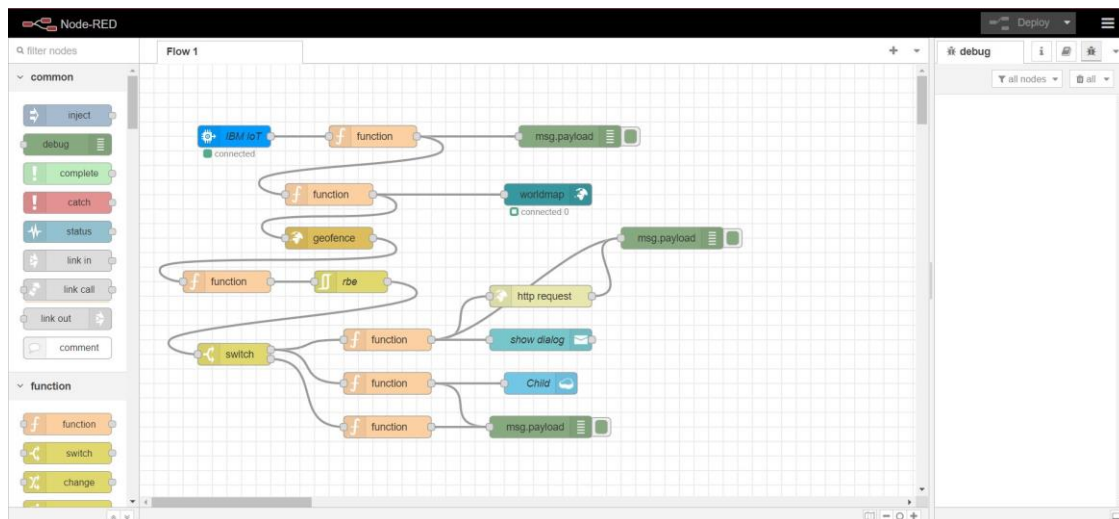

Team ID : PNT2022TMID48118

Aim:

Develop the web application using Node-RED

Steps Followed:

- Opened a Node-RED project

- Added code to get child location in python

```
child.py - C:\Users\Anu\AppData\Local\Programs\Python\Python37\child.py (3.7.0)
File Edit Format Run Options Window Help

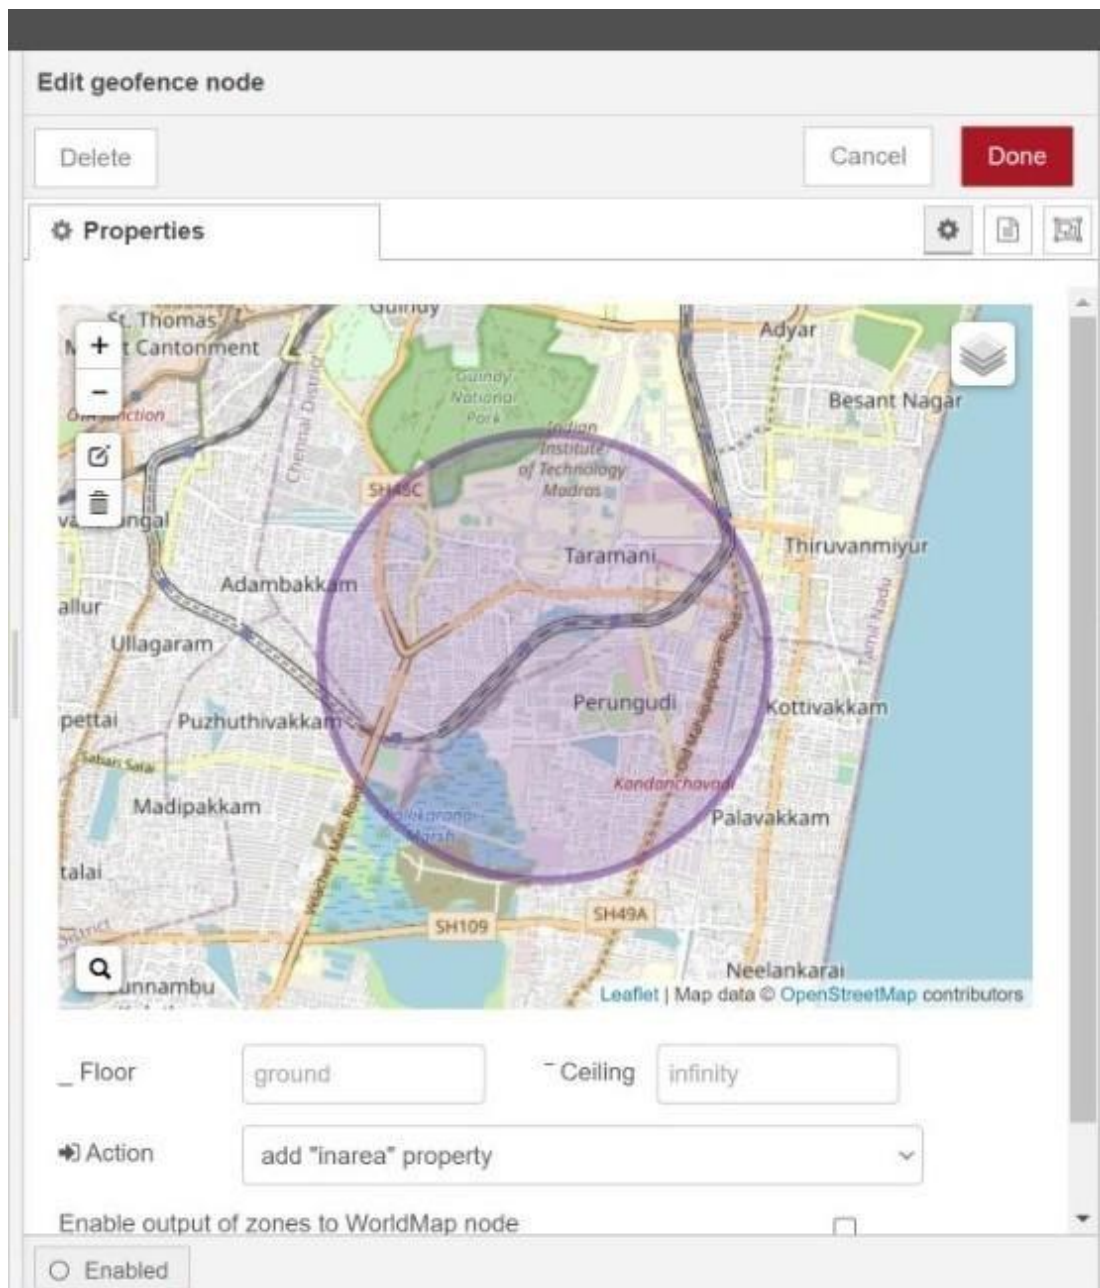

import json
import wiotp.sdk.device
import time
myConfig = {
    "identity": {
        "orgId": "401qab",
        "typeId": "TestDeviceType",
        "deviceId": "12345"
    },
    "auth": {
        "token": "pnhXvzN-sMMKvshxyi"
    }
}
client= wiotp.sdk.device.DeviceClient(config=myConfig, logHandlers=None)
client.connect()

while True:
    name = "Smartbridge"
    #in area location
    latitude = 17.4225176
    longitude = 78.5456842

    #out area location
    #latitude 17.4219272
    #longitude 78.5489783
    myData={'name': name, 'lat':latitude, 'lon': longitude}
    client.publishEvent(eventId="status", msgFormat="json", data=myData, qos=0, onPublish=None)
    print("Data published to IBM IoT platform: ",myData)
    time.sleep(5)

client.disconnect()
```

- Created the Geo-Fence

- Editing the HTTP Request URL

- Located the child

- Created the geo-fence node

- Python script sending requests to IBM Cloud

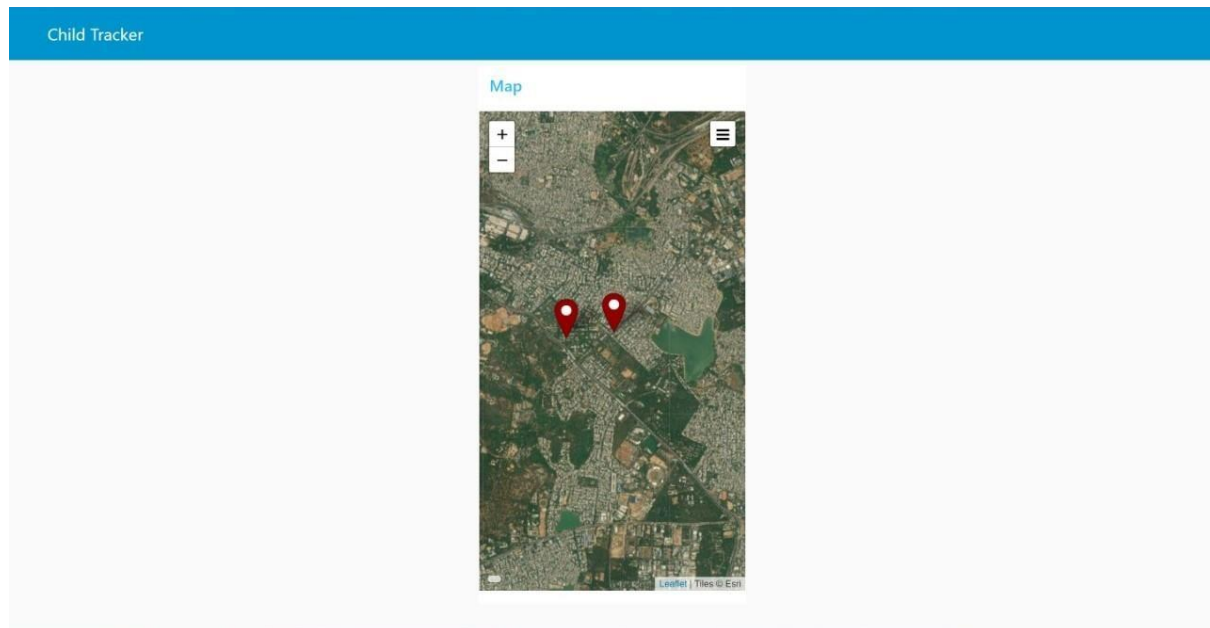

```
child.py - C:\Users\Anu\AppData\Local\Programs\Python\Python37\child.py (3.7.0)
File Edit Format Run Options Window Help
import json
import wiotp.sdk.device
import time
myConfig = {
    "identity": {
        "orgid": "401gxb",
        "typeId": "TestDeviceType",
        "deviceId": "12345"
    },
    "auth": {
        "token": "pnhKvzN-sW8Kv4hxyI"
    }
}
client = wiotp.sdk.device.DeviceClient(config=myConfig, logHandlers=None)
client.connect()

while True:
    name = "Smartbridge"
    #in area location
    #latitude = 17.4225176
    #longitude = 78.5456842

    #out area location
    latitude = 17.4219272
    longitude = 78.5400783
    myData = {'name': name, 'lat': latitude, 'lon': longitude}
    client.publishEvent(eventId="status", msgFormat="json", data=myData, qos=0, onPublish=None)
    print("Data published to IBM IoT platform: ", myData)
    time.sleep(5)

client.disconnect()
```

- After running the script, the web UI shows “Person is not in the particular area”

Result:

Successfully developed the web application using Node-RED
